SANDEEP PUCHA

Hyderabad, Telangana 500076 | 9182022463 | sandeeppucha648@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience building enterprise web applications and AI-powered tools, spanning React/Node.js frontend and backend, Python/Fast API services, and GenAI-driven features such as retrieval-augmented (RAG) resume matching and HR chatbots. Delivered workflow-automation platforms used across departments to digitize approval and document-management processes for enterprise clients, and shipped production RAG applications that reduced manual screening effort. Comfortable owning both frontend and backend layers, integrating SharePoint/Power Automate workflows, and working with relational databases MySQL via Sequelize/Type ORM. Solid grounding in Data Structures and Algorithms (intermediate level).

EXPERIENCE

Full Stack Developer | ABSYZ Software Consulting Private Limited.

Sept 2023 – Present

- Built and maintained enterprise web applications using React, Node.js, Express.js, SPFx, MySQL, and PostgreSQL, supporting **500+** active users / **5** departments across client organizations.
- Designed workflow-based approval systems that digitized manual approval and document-management processes, cutting average approval turnaround time from **1 day** to **2 hours** (a **75**% reduction).
- Built dynamic threshold-based approval routing and role-based access control (RBAC), reducing incorrect/misrouted approvals by **85**% and improving audit compliance.
- Implemented secure file upload, document processing, and centralized retrieval with validation and access control, supporting **200**+ documents processed per month.
- Improved application performance by introducing reusable components, pagination, and optimized API/database queries, cutting average page load time by **30%** /second
- Integrated SharePoint and Power Automate workflows to streamline enterprise approvals and document handling, eliminating **15** hours of manual work per week.
- Built and integrated RESTful APIs with Express.js and Python Fast API to power frontend-backend communication for **3**+ enterprise services.
- Built a GenAI/RAG-based resume parsing and JD-matching engine, improving candidate shortlisting speed by **80**% and matching accuracy to **70-80**%.
- Enhanced an HR chatbot's response accuracy and policy-retrieval pipeline, reducing average query resolution time by **35**% and cutting manual HR support tickets by **75**%.
- Collaborated with cross-functional teams (product, design, QA) across requirement gathering, architecture, development, and deployment for **20**+ enterprise releases.
- Followed clean coding, scalable architecture, and secure development practices throughout the project lifecycle.

TECHNICAL SKILLS

- **Frontend Development:** React JS, SPFx HTML5, CSS3, Bootstrap, Material UI, Redux
- **Backend Development:** Node JS, Express JS, Sequelize, Type ORM, SharePoint
- **Programming:** Python, JavaScript
- **AI / GenAI:** RAG pipelines, resume/JD matching, conversational chatbots (FastAPI-based)
- **Databases:** MySQL, SQL querying & data transformation
- **Version Control & Collaboration:** Git, GitHub
- **Other:** REST APIs, AJAX, Axios, JSON, AWS Basics (EC2, S3, Lambda), Power Automate, Data Structures Algorthims (Intermediate)
- **Tools:** Postman, VS Code, MS Office Tools

KEY PROJECTS

Project #1 — Profile Enhance

Client: IT Services
Role: Full Stack Developer
Technologies: React.js, React Hooks, Axios, Gen AI, RAG, Python Fast API, PostgreSQL
Impact: Built the entire front-end UI in React using functional components and hooks (use State, use Effect, use Context) for a Resume Screening and Shortlisting platform, including dynamic JD-to-resume match dashboards, filterable candidate lists, and real-time match-percentage visualizations. Integrated REST APIs (Axios) with a Python Fast API/RAG backend to render AI-generated candidate suggestions live in the UI. Reduced manual resume screening time by 80% and improved shortlisting accuracy for Project Managers and Sales teams.

Project #2 — E-Files Management System

Client: Automobiles and Manufacturing
Role: Frontend Developer
Technologies: React.js, SPFx (SharePoint Framework), SharePoint, Power Automate
Impact: Developed the complete front-end in React.js within the SPFx framework — building reusable, prop-driven components for secure document upload, retrieval, preview, and deletion. Implemented client-side state management for real-time notification updates and role-based UI rendering. Optimized component re-renders for large file lists serving 600+ employees, cutting manual document-handling effort by 60%.

Project #3 — Crack It

Client: IT Services
Role: Full Stack Developer
Technologies: React.js, Node.js, Express.js, MySQL
Impact: Built the React front-end for an end-to-end recruitment platform, covering candidate shortlisting, interview scheduling, and feedback workflows, with reusable form components, client-side validation, and dynamic pipeline-stage views. Connected to Node.js/Express REST APIs for real-time status updates across recruiters and interviewers. Reduced average time-to-hire by 40% and streamlined coordination across 20+ recruiters/interviewers.

Project #4 — Indent Approval Process

Client: Hardware Manufacturing and Services
Role: Full Stack Developer
Technologies: React.js, SPFx (SharePoint Framework), SharePoint, Power Automate
Impact: Built the React-based UI layer within SPFx for a cross-departmental approval workflow app, including real-time approval status tracking components, role-based conditional rendering, and centralized document views. Structured reusable React components to support 15+ distinct approval workflows without duplicating logic, reducing approval turnaround time by 75%.

Project #5 — HR Chatbot

Client: IT Services
Role: Backend Developer
Technologies: React, Gen AI, RAG, Python Fast API, PostgreSQL
Impact: Contributed to the React front-end chat interface (message threading, typing indicators, real-time response rendering) while primarily building the backend RAG retrieval pipeline in Python Fast API that powered it. Helped ensure the React UI consumed streaming/API responses efficiently, cutting average query response time to 2 seconds and manual HR support requests by 75%.

EDUCATION

- **BTech (Bachelor of Technology) in Electrical & Electronics** — **7.5 CGPA, 2022**
  Bharat Institute of Engineering and Technology, Ibrahimpatnam
- **Diploma in Electrical & Electronics** — **91.33%, 2016–2019**
  Anurag College of Engineering, Ghatkesar
- **SSC High School** — **9.2 CGPA, 2015–2016**
  Mother Meera High School, Moula-Ali
